Subject: 39 GHz Proceeding

Commr Chong:

I am concerned that, if reports are to be believed, some are suggesting that the Commission give consideration to establishing sharing between satellite and incumbent terrestrial systems in the 39 GHz band. In addition to stymying what will otherwise be a significant source of competition to entrenched local exchange companies, licensing satellite facilities in the existing 39 GHz band would be patently unfair to those early entrepreneurs which have worked hard, and invested much, to develop this band.

Should the Commission give any serious consideration to satellite/terrestrial sharing in this band, I greatly appreciate your permitting me to meet with you to further discuss this matter.

Best regards,

Dennis Patrick
